TECHNICAL PROJECTS

Geera | Full-Stack Developer | **React, Express, Node.js, MongoDB, Socket.io, JWT** 2020

- *A clone of Jira, a project management application*
- A project management platform where members of the team are able to efficiently manage their tasks
- Improved upon Jira's feature, where creating a task will instantly populate it for the creator and all the members
- Leveraged JWT for secure user login and registration
- Integrated Socket.io for responsive communication between members through comments

Demon Slayer | Full-Stack Developer | **Unity, C#** 2020

- *2d Action RPG Platformer game based on popular Japanese Anime*
- Integrated multiple enemy A.I. features, ranging between patrolling and persistent target pathing
- Implemented a Save/Load system through the use of Binary Formatter and localization through File Stream
- Designed and developed a game in Unity, employing a combat system between the player and enemies
- Employed responsiveness through animation events, and a fluidity in the scenes with Parallax Effects

OneStopShop | Full-Stack Developer | **Python, MySQL, Jinja2, Html5, CSS, Bootstrap, JavaScript/jQuery/AJAX** 2020

- *E-commerce website selling customizable apparel*
- Pulled Printful's inventory, item images, and prices through their API
- Employed a responsive frontend design with Bootstrap, jQuery, and AJAX
- Leveraged Bcrypt's password hashing function to enhance user security
- Payment process integration employed through Stripe API

PROFESSIONAL EXPERIENCE

Help Desk Technician | **Saalex Solutions, Inc** – Camarillo, CA
Game Development Intern | **Tatum Games LLC** – Remote

SEP. 2018 – FEB. 2020
Feb. 2018 – Jun. 2018
